## WHAT SHOULD YOU LOOK FOR IN DIVE TRAINING?

---

Know your dive shop and instructors before you purchase anything!!  
Shop agency affiliations-Check our references – just because an agency is listed on a website doesn't mean they recognize that shop.  
Level & experience of Instructors  
How long have those Instructors been teaching?  
How many students have been certified this year, last year, total?  
Do they staff Divemasters?  
Air quality and certification  
Tours of the Shop, Service Center and Dive Locker  
How long has the shop been in business?  
Efforts to promote safe environmental practices

# NITROX

Enriched air nitrox is a great tool to help you enjoy longer dives. Enriched air makes this possible because it contains less nitrogen and a higher percentage of oxygen than normal air. This means that you absorb less nitrogen as you dive, giving you longer no decompression limits. The objective of this course is to train divers in the benefits, hazards and proper procedures for using nitrox mixes from 22% to 40% oxygen content.

In this course you will:

- Be able to stay underwater longer
- Be able to get back into the water sooner
- You will learn about enriched air dive planning
- Care for equipment
- Hazard management
- Use and application of enriched air

You earn your Nitrox Diver rating by reviewing the material and completing certification dives:

## Home Study

- Read the text book
- Complete the knowledge reviews

## Academic Session

- Summarize and review textbook
- Discuss additional information
- Questions/answers

## 2 Certification Dives (Open Water)

## SUPPLIES

---

### Required Course Supplies:

Textbook and Log Book

### Required Dive Gear:

Personal Dive Gear (Fins, Booties, Mask, Snorkel, Weight belt), Weights, Regulator, BCD, Wetsuit

We find that students perform better and enjoy their scuba experience more if properly fitted and maintained personal gear has been used.
